IPv4 Address Allocation

- TWNIC has allocated 131,702 /24s IPv4 addresses
- The IPv4 application grow slowly these few years

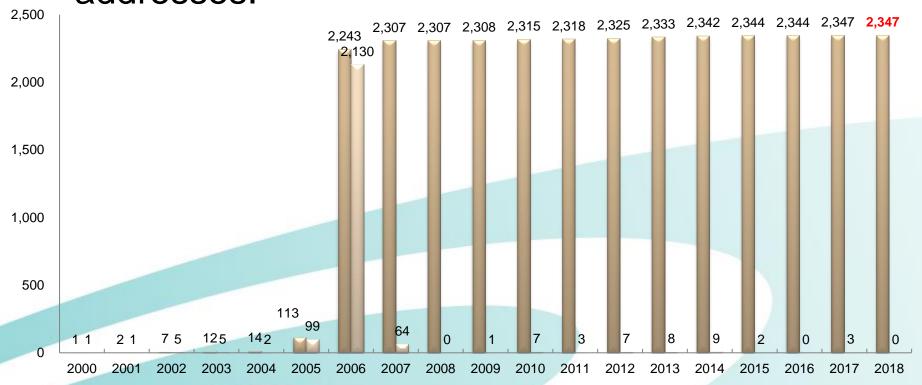

Unit: /24

IPv6 Address Allocation

- TWNIC has allocated 2,347 /32s IPv6 addresses
- Most of TWNIC IP members have obtained IPv6 addresses.

Unit: /32

2017 Taiwan Internet Forum & 29th TWNIC IP OPM

- Time: December 12-15, 2017
- Keynote speeches:
 - 5G Development of Telecommunication Industry in Taiwan Kuo-Feng Lin, Chunghwa Telecom
 - Development of IoT and AI in Telecommunication Industry Philip Tseng, Far Eastone
- Session topics include IPv6 Development, IPv6 Upgrade, Security Workshop, Domain Name Development, Taiwan Youth Internet Forum, Network Security Seminar, etc.
- To see the detail agenda, visit http://www.ipv6.org.tw/summit2017

4G ISP IPv6 Trial Project

- Trial Period: 2017/7/1~2017/12/31
- Trial Object: The exist 4G customers of Chunghwa Telecom, Far EasTone, and Taiwan Mobile, 3 main telecom operators in Taiwan.
- Process:
 - The customer submit the application
 - Set up the APN protocol to IPv4/IPv6
 - The telecom operators activate the IPv4/IPv6
 - Access Internet with 4G IPv4/IPv6
- Most participants could access internet with IPv4/IPv6 in this trial project.

Conclusions & Future Works

- 4G ISP IPv6 trial is a successful project. The user experience is good and we got positive feedback.
- The telecom operators have done the trial service and plan to provide 4G LTE commercial IPv4/IPv6 service this year.
- We will continuously hold IPv6 training courses and IPv6 activities this year.
- Welcome to attend the IPv6 readiness measurement BoF this afternoon.

Thank You
